# WHAT IS POLYETHYLENE?

Polyethylene is a hydrocarbon product that is considered to be environmentally friendly and does not easily swell or dissolve in most common solvents.

## SAFETY

Because of the flexibility of the HDPE pipe and the rugged valve connection, a long pipeline can be assembled above ground with preinstalled valves and then placed in the pipe trench.

## MAIN FEATURES & BENEFITS

- Boltless end connection speeds up pipe installation.
- Direct welding to HDPE pipes by using socket electrofusion or butt welding provides fast, effective, and secure joints.
- Compression joining of HDPE pipe to the valve provides continuous tightness and tensile resistance.
- Flexibility when choosing HDPE material because all types will connect to Kennedy PE valves.
- Valve coupling compression feature offers strength beyond the tensile strength of the HDPE pipe.
- Superior corrosion protection.
